# APPLIANCES / 電器概覽

For complete instructions on the operation and care of your appliances, please refer to the appliance manuals located under the Appliance Manuals tab in the Customer Care section of the concordpacific.com web site. It is important to read through all manuals before using the appliances.

A paper copy of all Appliance Manuals was left in your kitchen drawer during your suite Walk-Through.

## FLOORING / 地面保養

### Laminate Flooring

A few moments of care and a little common sense can go a long way in keeping your new floors looking their best.

#### Routine Maintenance:

- Use a damp cloth to blot up spills as soon as they happen as excess water can damage the surface and seep into the seams of the flooring.
- Sweep, dust or vacuum the floor regularly (once or twice a week). Use a broom with soft bristles and/or a vacuum with the hardwood attachment only.
- Periodically clean the floor with cleaning products made specifically for laminate/wood floor care.
- DO NOT wash or wet mop the floor with soap, water, oil-soap, detergent, or any other liquid cleaning material. This could cause swelling, warping, delamination, and joint-line separation, and void the warranty.
- Do not use steel wool, abrasive cleaners, or strong ammoniated or chlorinated type cleaners.
- Do not use any type of buffing or polishing machine.

#### Environmental Protection:

- Entry mats will help collect the dirt, sand, grit and other substances that might otherwise be tracked onto your floor.
- To prevent slippage of area rugs, use an approved vinyl rug underlayment.
- Use floor protectors and wide-load bearing leg bases/rollers to minimize the chance of indentations and scratches from heavy objects.
- Remember, preferable temperature should be approximately 17-23°C (62-73°F with a relative humidity of 54-60%. Humidity should never be allowed to drop below 30% as this may cause gapping. (Proper humidity levels should be maintained by using your exhaust fan, which has a timer switch on the wall in the closet.)
- Keep your pet's nails trimmed to prevent them from scratching your floor

### Tile Flooring

Wash with water and a pH neutral cleaner; rinse with warm water and allow to dry. Always wipe up spills immediately to prevent staining of the grout.

**NOTE:** It is the homeowner's responsibility to re-seal the grout with a certified grout sealant. This should be done on an annual basis. You can purchase a grout sealer from your local home improvement store.

### Carpet

Regular vacuuming is the most important maintenance step. Remove spills immediately. DO NOT RUB THE CARPETS. Have your carpets professionally cleaned as required. Consider wearing slippers as the oil from bare feet and socks can rub off on the carpet and cause the surface of the carpet to mat.
