HARD SURFACES/ 材料保养

Laminate & Engineered Flooring

A few moments of care and a little common sense can go a long way in keeping your new floors looking their best.

Routine Maintenance:

- Use a damp cloth to blot up spills as soon as they happen as excess water can damage the surface and seep into the seams of the flooring.
- Sweep, dust or vacuum the floor regularly (once or twice a week). Use a broom with soft bristles and/or a vacuum with the hardwood attachment only.
- Periodically clean the floor with cleaning products made specifically for laminate/wood floor care.
- DO NOT wash or wet mop the floor with soap, water, oil-soap, detergent, or any other liquid cleaning material. This could cause swelling, warping, delamination, and joint-line separation, and void the warranty.
- Do not use steel wool, abrasive cleaners, or strong ammoniated or chlorinated type cleaners.
- Do not use any type of buffing or polishing machine.

Environmental Protection:

- Entry mats will help collect the dirt, sand, grit and other substances that might otherwise be tracked onto your floor.
- To prevent slippage of area rugs, use an approved vinyl rug underlayment.
- Use floor protectors and wide-load bearing leg bases/rollers to minimize the chance of indentations and scratches from heavy objects.
- Remember, preferable temperature should be approximately 17-23°C (62-73°F) with a relative humidity of 54-60%. Humidity should never be allowed to drop below 30% as this may cause gapping.
- Keep your pet's nails trimmed to prevent them from scratching your floor

Marble Tile

Wash with water and a PH neutral cleaner; rinse with warm water and allow drying. Always wipe up spills immediately to prevent staining of the grout.

NOTE: It is the homeowner's responsibility to re-seal the grout with a certified grout sealant. This should be done on an annual basis. You can purchase a grout sealer from your local home improvement store.

Engineered Quartz Counters

Quartz countertops are composed of ground quartz stone, pigments, and resin. They are naturally glossy and should not require polishing.

In order to care for your quartz countertops, use non-abrasive cleaners for cleaning. Avoid hard pressure and quick changes in temperature. Do not use metal utensils to remove stuck on material.
