

ecobee | SmartSensor

5-year battery life

Designed to last longer.

PIR Sensor

Energy savings with temperature and occupancy detection.

Magnetic Swivel

Flexible positioning

Use the stand to place your sensor on a table or shelf. If you've picked a spot that's higher than 5 feet, use the wall-mount.

Wall-mount

Use with wall-mount, or stick to the wall if you've got curious children or pets.

The remote thermostat sensor with a sixth sense for your comfort and peace of mind.

Comfort where you need it

Place sensors in the rooms that matter most to experience comfort that stays with you.

Works with ecobee Smart Security

SmartSensor works as a motion sensor with Smart Security, which sends notifications and detects motion when the home is armed.

Designed for longevity

SmartSensor comes with a battery life of up to 5 years.

Easy installation

No wires, installs in seconds. Use the app to effortlessly connect SmartSensor with ecobee thermostats.

Set up made simple

Scan the QR code and learn more about pairing your ecobee SmartSensor in a few simple steps. You'll also discover a convenient how-to video located in the "setup and features" section of the site.
